Enterprise AI Governance & Orchestration Platform

Monitor AI workflows • Reduce governance risk • Improve sustainability • Optimize costs

An enterprise AI governance and orchestration prototype that helps organizations monitor AI workflows, identify governance risks, reduce inefficiencies, and improve sustainable AI usage.

Total AI Workflows	Monthly AI Cost	Average Risk	Average Efficiency	AI Governance Health
30	\$61,725	55.8	64.6	57.4/100

Executive Governance Insights

Governance Maturity

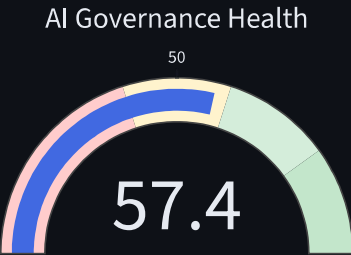

Developing

Governance processes exist but need stronger controls.

Potential Annual Savings

\$69,283

Estimated from workflows with low efficiency scores.

Industry Benchmarking

Governance vs Industry	Sustainability vs Industry	Risk vs Industry
57.4	73.9	55.8

↓ -10.6

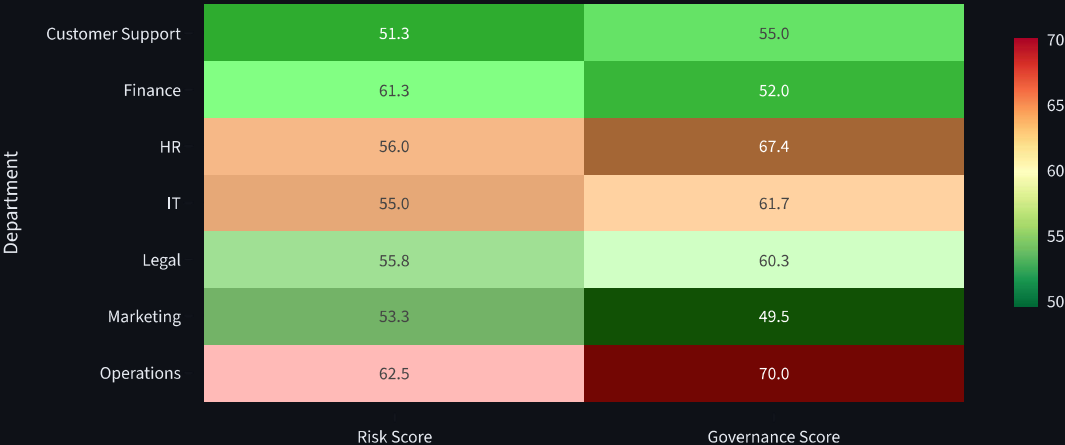

↑ 11.9

↑ 0.8

Governance performance is below the selected industry benchmark. Improvement is recommended.

AI Governance Risk Heatmap

Department Governance Risk Overview

Executive AI Governance Scorecard

Governance

Needs Attention

Overall AI governance maturity level.

Risk

Moderate

Average operational and compliance risk.

ESG

Good

Sustainability and carbon efficiency performance.

Cost Efficiency

Savings Opportunity

Estimated savings from inefficient workflows.

Compliance

Needs Review

High-risk workflows requiring review.

AI Tool Consolidation Analysis

	AI Tool	Workflow Count	Monthly Cost
0	ChatGPT	4	8820
1	Claude	6	11062
2	Excel AI	5	13971
3	Gemini	6	9372
4	HubSpot AI	2	4759
5	Power BI Copilot	3	5813
6	Zapier AI	4	7928

AI Platforms in Use

7

Potential Annual License Savings

\$12,000

Multiple AI tools are performing overlapping functions. Consider consolidation to reduce costs and governance complexity.

ESG & Carbon Efficiency Metrics

Average Carbon Usage

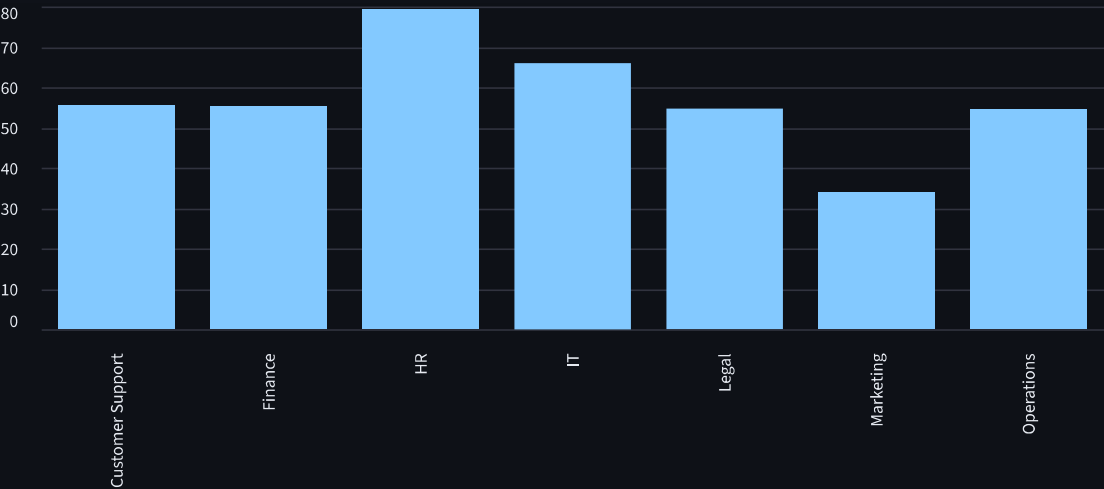

55.9 Units

Average Energy Efficiency

66.3/100

Average Sustainability

73.9/100

Sustainable AI Operations Dashboard

Carbon Usage

55.9

Energy Efficiency

66.3/100

Sustainability Rating

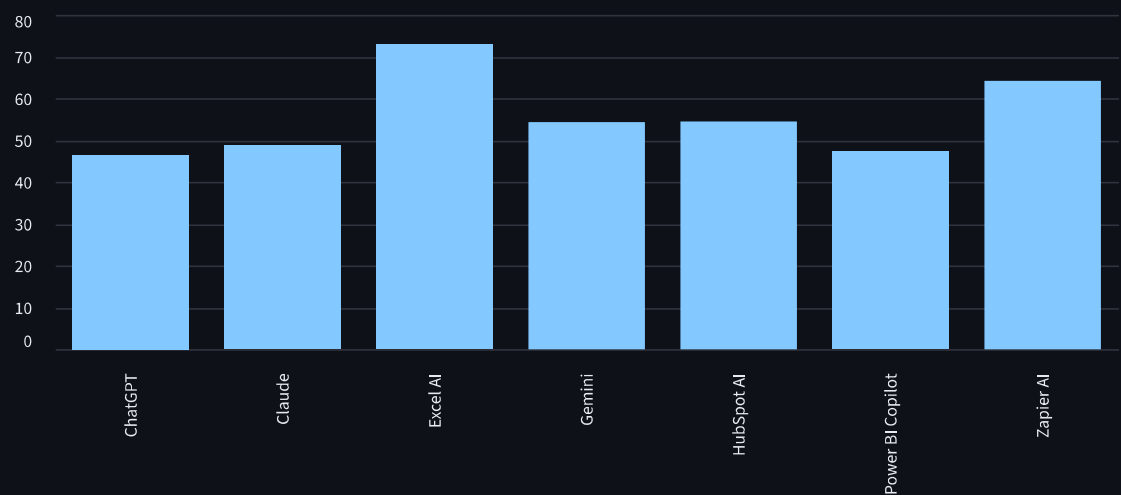

73.9/100

High Carbon Workflows

9

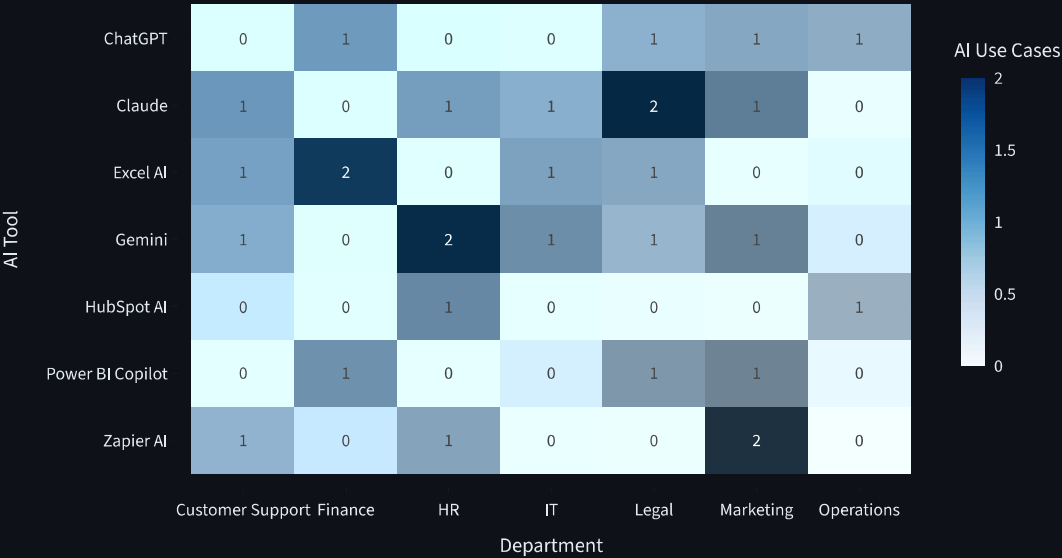

Sustainability performance is moderate. Optimization is recommended.

Average Carbon Usage by AI Tool

AI Tool Usage by Department

AI Tool Adoption Across Departments

7 AI platforms are currently in use. Tool consolidation may reduce governance complexity and licensing costs.

AI Strategy Recommendations

	Workflow ID	Department	Workflow	Risk Score	Compliance Risk	Data Sensitivity
3	WF-004	Legal	Customer Support Chatbot	75	High	Medium
4	WF-005	HR	Credit Risk Scoring	80	High	High
19	WF-020	Customer Support	Fraud Detection AI	80	High	High
28	WF-029	Finance	Fraud Detection AI	80	High	High

Board-Level Executive Summary

Governance Status: Needs Improvement

Key Findings

- 4 high-risk workflows identified
- Monthly AI spend: \$61,725
- Governance Health Score: 57.4/100
- Sustainability Score: 73.9/100

Executive Recommendation Prioritize governance controls, AI tool consolidation, ESG monitoring, and compliance oversight to improve enterprise AI maturity.

the 'information' and 'communication' fields. The 'information' field is defined as:

...the study of the processes of information production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

The 'communication' field is defined as:

...the study of the processes of communication production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

The 'information science' field is defined as:

...the study of the processes of information production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

The 'information studies' field is defined as:

...the study of the processes of information production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

The 'information technology' field is defined as:

...the study of the processes of information production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

The 'information systems' field is defined as:

...the study of the processes of information production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

The 'information management' field is defined as:

...the study of the processes of information production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

The 'information policy' field is defined as:

...the study of the processes of information production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

The 'information law' field is defined as:

...the study of the processes of information production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

The 'information ethics' field is defined as:

...the study of the processes of information production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)
